**Subject:** Microsoft Settlement

The corrupt and criminal Clinton administration is thankfully over and the Executive Branch has been returned to honor. Because of the staggering turpitude of the Clinton administration, there is much work yet to be done to root out the continuing disgrace that it was.

One large item on that list must be the settlement of the Microsoft case. I strongly support the settlement. Successful entrepreneurs who create thousands of jobs and add real value to our world ought to be praised and emulated, not sued and mocked.

Bill Zipfel
